

# YORKSHIRE CONSERVATORY ROOF INSULATION

COOLER IN SUMMER/WARMER IN WINTER

**Yorkshire Conservatory Roof Insulation** is run by local builder Tim Bowles, who has been in business in the building trade for over 25 years. The majority of his work has been involved with the supplying and fitting of conservatories including all building work. He has also built many house extensions so his knowledge within this trade is extensive.

We offer two methods of converting your conservatory from an under-used space, into a cosy, welcoming extension to your home that provides the same levels of comfort all year round. With both systems there is no requirement for planning permission or building regulations:

1. Replace the existing conservatory roof with the new tiled roof system. These roofs can be fitted with a range of roof lights that will continue to flood your conservatory with natural light. *(Complies with building regulations approval)*
2. Insulate the existing conservatory roof with a 19 layer reflective material. This surprisingly affordable solution will transform the conservatory room no matter what the weather. Also it is HMRC approved for a green incentive VAT reduction to 5%.

### **Yorkshire Conservatory Roof Insulation offer the following:**

A detailed site survey carried out completely free of charge, resulting in a no-obligation quote. Insulation performance values that far outweigh the benefits of any other insulating system, e.g. roof blinds. A 5 year guarantee on all work.
